 - 10 piece minimum **per** carrier route to qualify.
 - Non-qualifying pieces will revert to the regular rate.
 - High density rate requires 125 pieces per carrier route sorted in “walk sequence.”

- NOTES:**
- **All mailings** that are mailed at presort, automation, or carrier route rates must be processed through both C.A.S.S. Certification and P.A.V.E. software. Certification forms must be delivered with each mail drop to the post office certifying that these processes have been completed.
 - There are specific dimension and weight restrictions (by piece and by class) that must be adhered to in order to utilize postal automation equipment.
 - **Tabbing is required** for all mail pieces that are not closed on all sides or contained in a closed envelope if mailing at automation rates.
 - Many new mail processing requirements are in effect with classification reform (e.g. barcoded tray tags, tray size, tray strapping).
 - Move update verification/certification is required using an approved USPS process for any postage discounts.
